

deHertz

Fine jewelry
with a *perfect memory.*

HEAR · REMEMBER · UNDERSTAND

Every conversation you have ever had is gone. *Except the ones from today.*

Most of what matters in a working day is said, not written. The number a client mentions in the lift. The date a contractor agrees to on the site walk. The thing your doctor says that you meant to look up later. By evening, a good day has thirty decisions in it and you can reconstruct four.

Note-taking apps ask you to stop and type. Meeting bots only join the meetings that have a link. Neither is with you in the corridor, at lunch, in the car — where the real conversations happen.

deHertz is worn, not carried. A 36 mm pendant on a fine chain, made to be seen. It listens through your whole day or just one conversation, and hands you back every word — transcribed, summarised, searchable — in the fifteen languages this region actually speaks, often within a single sentence.

It is built in Dubai for how business is done here: in Arabic and English and Hindi in the same meeting, on WhatsApp, on the move. And it is built so that recording is done **openly** — the light shows when it is capturing, and the conversation is encrypted on the pendant before it goes anywhere.

All-day ambient, or one conversation

36_{mm}

worn as jewelry

Aluminium, on a fine chain

1

price, all in

AED 499 — pendant and a year of AI

36 mm of engineering, *machined not moulded.*

An aluminium-alloy body, a MEMS microphone tuned for rooms rather than studios, a status light you can see from across a table, and a magnetic charger that finds its own way on.

Heard from anywhere

A digital MEMS microphone behind a laser-drilled port picks up a conversation across a boardroom table, not just the person wearing it.

Seen, on purpose

The status light shows whenever the pendant is capturing. Recording is a decision the room can see you make.

Charged by Sunday lunch

Empty to full in about 45 minutes on the magnetic dock or USB-C. Up to 18 hours of recording; a week on standby.

THE PENDANT

03

You talk. *It remembers.*

Not a feature list — a Thursday. Three conversations, and what you get back from each.

9:05 AM

The site walk you didn't take notes in.

Forty-two minutes on floors five and six. You were looking at the glazing, not at your phone. By the time you're back in the car, the decisions and the two things you promised are already written down.

11:30 AM

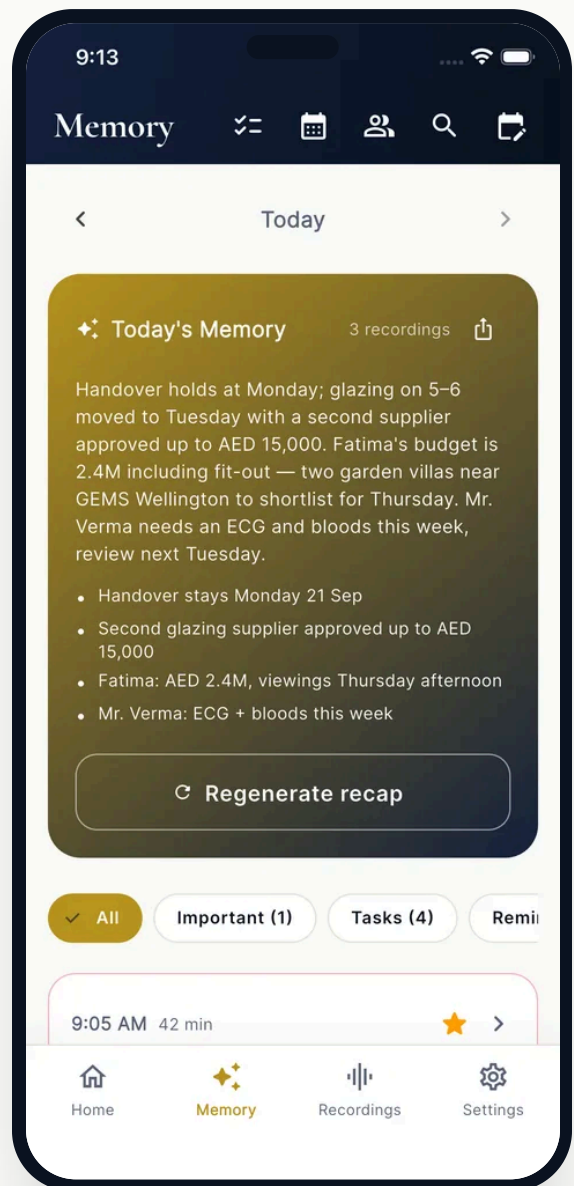

The client who switches languages mid-sentence.

Fatima opens in Arabic, you answer in English, the budget is in numbers. The transcript keeps every speaker and every language in its own script — and the reminder she asked for is set for Thursday, 2 PM, before you've hung up.

6:40 PM

The whole day, on one card.

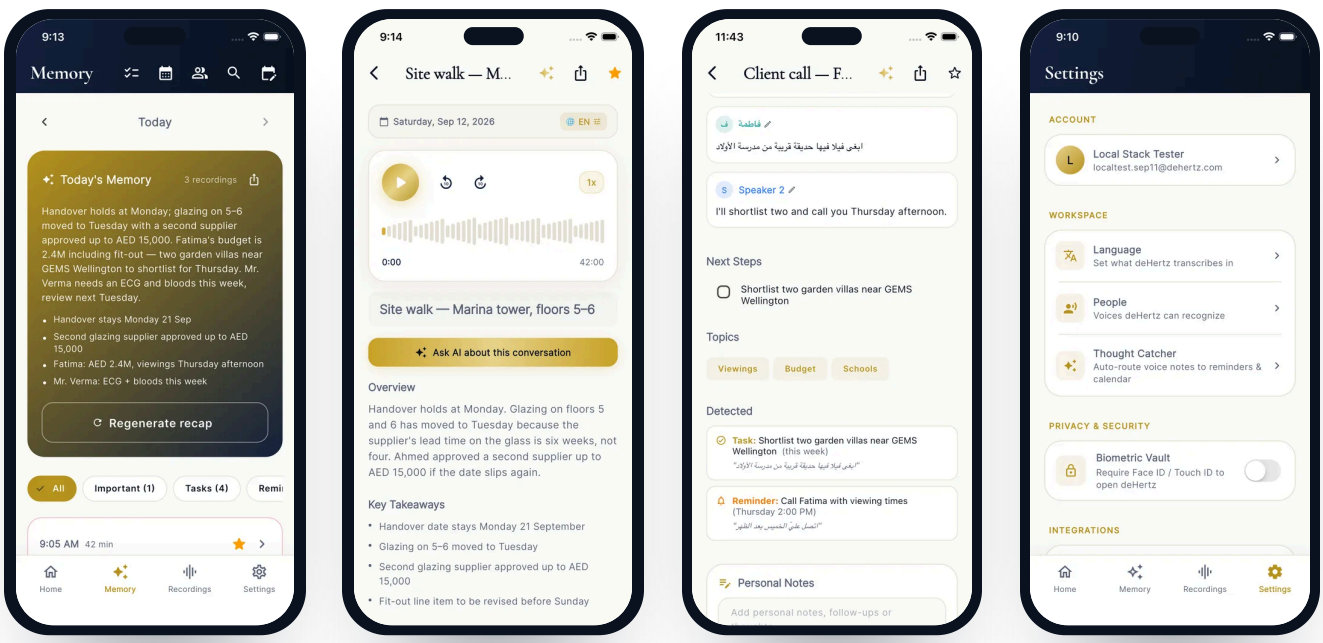

Three conversations become one recap: what was decided, what's still open, who promised what. Read it in the time it takes the valet to bring the car.

Today's Memory — the day's recap, as the app shows it.

Where the conversation *becomes* useful.

The pendant listens. The app is where a day of talking turns into something you can read in a minute and search in a second. These are the real screens.

- Memory**

The whole day on one card. What was decided, what's open, who promised what.
- One conversation**

Play it back, read the overview, or ask it a question.
- Detected**

Tasks and reminders pulled out, each with the exact words they came from.
- Yours to control**

Voices it recognises, the language it transcribes in, Face ID on the vault.

Search every word

Full-text search across every transcript you have ever made. "Lead time" finds the sentence, and the day.

Reminders from what you said

"Send me the contract Thursday" becomes a notification on Thursday. No typing.

Ask your memory

"What did Ahmed approve?" — answered from the conversation, with the quote.

People

Enrol a voice once; the transcript names them from then on.

Record without the pendant

Phone-microphone mode and audio import, for the day you left it at home.

Share a digest

Send the room the recap in one tap — WhatsApp, email, wherever.

It understands *the room*.

Meetings here switch mid-thought. deHertz follows the switch instead of asking you to pick — and writes each language in its own script.

SPEAKER 1 ·

Arabic

English

Hindi

Urdu

Spanish

French

German

Portuguese

Russian

Chinese

Japanese

Korean

Turkish

Italian

Tagalog

Gulf and Levantine dialects, and Arabic–English code-switching in the same sentence, are treated as first-class — because that is how most meetings here actually run.

Recording, done *in the open*.

Two ways to wear it, one rule in both: the room can always see when it's listening, and you can always stop it with one press.

Ambient

Worn all day. Captures quietly in the background so nothing is missed — the meeting that starts before you sit down.

Best for back-to-back days and corridor conversations.

Focused

You start it for one conversation, and stop it when you're done. Nothing either side of it.

Best for a client call or interview you want on the record.

✓ Status light on whenever the pendant is capturing

✓ Audio encrypted on the device before it syncs

✓ Delete a recording, and it is gone — no shadow copy

✓ Export everything you own, any time

✓ One press pauses; the app shows and controls the mode

✓ Face ID / Touch ID vault on the app

✓ Your conversations are never used to train anything

✓ Team workspaces keep each person's memory their own

A word on the law. Recording rules vary by country and, in the UAE, by emirate and context. The pendant is deliberately visible and its light shows when it is capturing, so recording is done openly rather than hidden — but the responsibility to comply and to tell people is yours. When in doubt, say you are recording.

The people whose day *is* the conversation.

EXECUTIVES

Ten meetings, one recap.

Every decision and every commitment from the day, without a chief of staff in the room.

"What did I agree to on Tuesday?" — answered, with the quote.

SALES & BROKERS

The number they said in the lift.

Budgets, preferences and objections captured where CRMs never reach — then the follow-up reminder sets itself.

Fatima: AED 2.4M, garden, near the school. Thursday, 2 PM.

CLINICIANS

Eyes on the patient, not the keyboard.

The consultation transcribed in the patient's language; the plan and the follow-up pulled out for the notes.

ECG and bloods this week. Review next Tuesday.

LAWYERS & CONSULTANTS

Every instruction, verbatim.

Client calls and site meetings on the record, searchable by keyword months later — with the exact words.

"...if the lead time moves again we switch supplier..."

REAL ESTATE & CONSTRUCTION

The site walk, written down.

Decisions made on floor five don't survive the drive back. Now they do — dates, suppliers, ceilings.

Second supplier approved up to AED 15,000.

TEAMS

One memory per person, one workspace per company.

Shared digests, private recordings, admin controls — and a price that doesn't scale per minute.

Ask us about corporate gifting and team pricing.

SPECIFICATIONS

The numbers, *in full.*

Recording time	Up to 18 hours continuous
Standby	7+ days
Charge time	0–100% in 45 minutes
Charging	USB-C and magnetic dock
Connectivity	Bluetooth Low Energy 5.0
Microphone	MEMS digital
Diameter	36 mm
Body	Aluminium alloy
Chain	450 mm, included
Languages	15
App	iOS 15+ · Android 9+
Warranty	1 year

- deHertz pendant
- 450 mm chain
- Magnetic charging cable (USB-C)
- User guide and thank-you card

Gold Edition

Brushed gold-finish aluminium, gold-tone chain. The one people ask about.

Midnight Black

Matte anodised, blackened chain. Disappears against a suit.

Recording time measured in continuous capture at room temperature; real-world life varies with use, ambient noise and sync frequency. Audio is encrypted on the device before it syncs.

— RESERVE YOURS

One price. *Everything included.*

AED 499 / first year

That's AED 1.37 a day — the pendant included.

- ✓ The pendant, chain and charger — yours to keep
- ✓ A full year of AI transcription and summaries
- ✓ Memory calendar, search, reminders, export
- ✓ One-year hardware warranty
- ✓ Free UAE delivery in 2–4 working days
- ✓ 14-day returns — we pay the courier
- ✓ Nothing renews automatically
